

TensorFlow Dataset

Notes Based On: [LINK](#)

TensorFlow Dataset

- The notes would cover uses of `tf.data.Dataset`

Basic Uses

- TensorFlow dataset supports writing descriptive and efficient input pipelines
- `tf.data.Dataset` uses a common pattern:
 1. Create a source dataset from input pipeline
 2. Apply dataset transformations to preprocess the data
 3. Iterate over the dataset and process the elements

Methods

- Methods could be looked up in TensorFlow documentation:
